
Axiom Lite for Redditch YMCA

Established for more than 30 years Redditch YMCA is a housing association which owns or manages over 200 properties.

Tim Ingamells Maintenance Manager at the YMCA recognised the need for additional security to ensure the tenants are in a safe environment whilst they are in their care.

Calling on the expertise of Dorian Dentith Champion Security Installations of Bromsgrove they chose the

Axiom Lite system from RBH Security Group. Dorian mentioned “The cost effectiveness and feature rich functionality of the Axiom Lite, provides an ideal solution for the YMCA’s requirements”

In addition to the ability to allow people access to designated areas the system also tracks the location of people to facilitate the use of the automated muster report feature in the event of a fire alarm. This in addition to the Photo ID option within the Axiom Lite has made the YMCA a more secure and stable environment.

Systems Implemented:
