| Panel 1 | Unknown |

The Axiom Lite software has a UNC100 pre-loaded as this is the most commonly used connection back to the server via IP on new installs.

The default IP address of the UNC100 is 192.168.168.125 Subnet 255.255.255.0 and gateway 192.168.168.1 Dip switch 1 should be up on the UNC100 for address 1

MAKE SURE YOU HAVE REMOVED THE PAPER FROM THE BATTERY ON THE BACK OF THE UNC100

| Description | Status |
|  Panel 1 | Unknown |

Under the comms tab the default IP of the UNC100 is already Configured along with the default port.

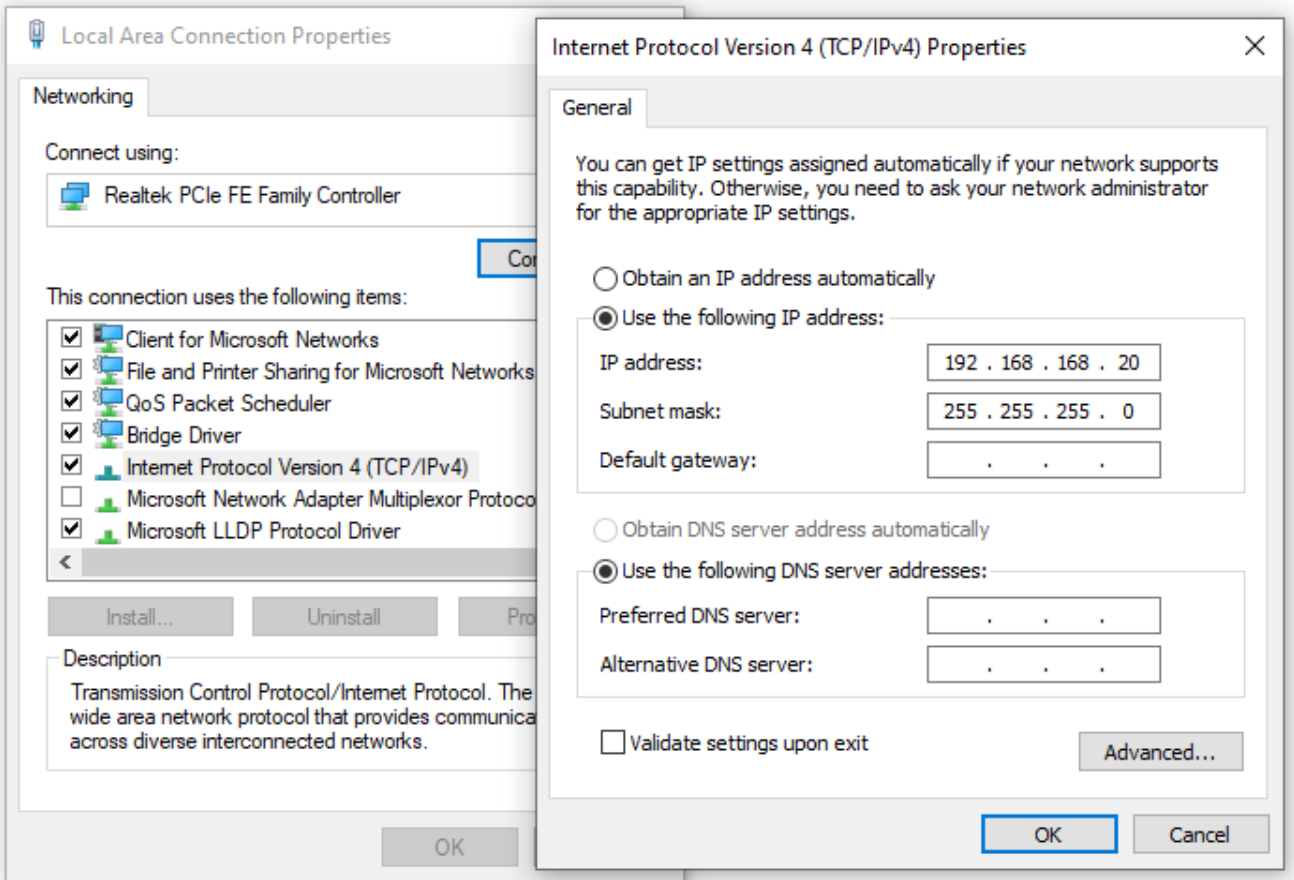

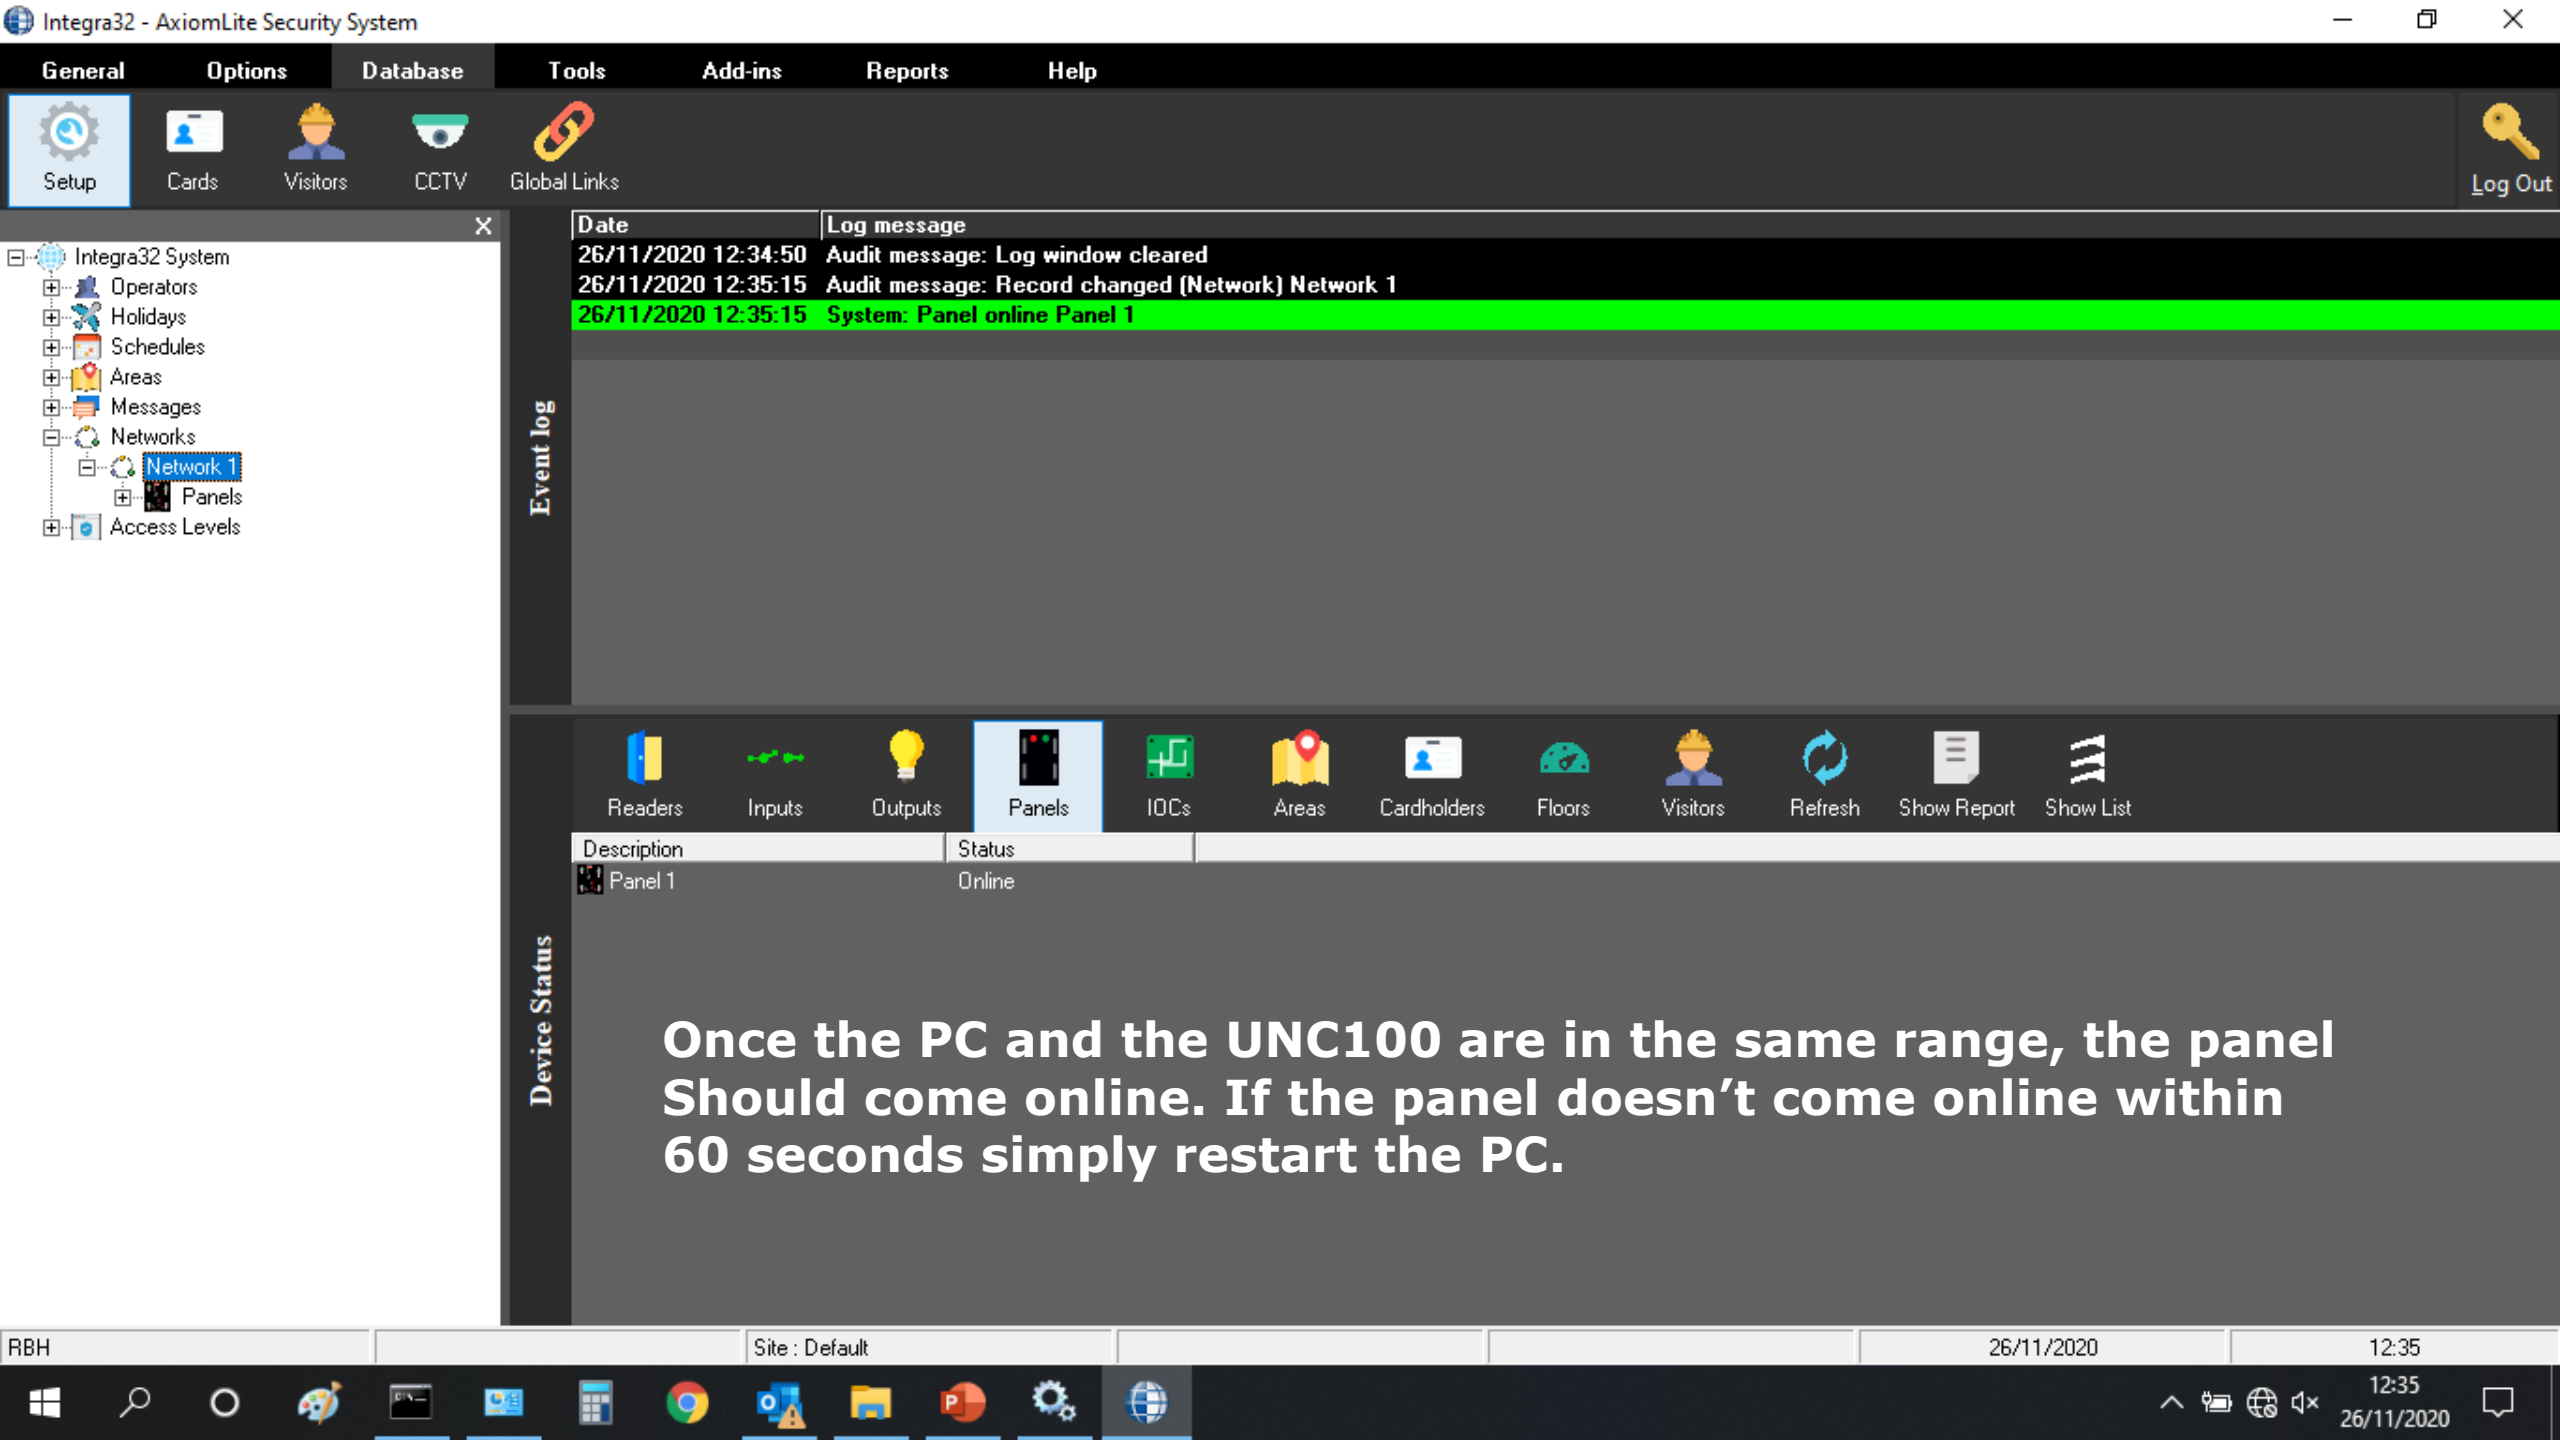

Set the default IP of your server PC To 192.168.168.20 with subnet 255.255.255.0

Default gateway is not required when Commissioning on your engineering Laptop but may be needed on the Customers network. (in this case the Customer should provide IP, Subnet And Gateway for the PC and the UNC100

DISABLE ALL OTHER CONNECTIONS AS THESE CAN INTERFERE WITH COMMUNICATIONS.

Click OK to confirm changes and return To your Axiom Lite software.

Device Status

Once the PC and the UNC100 are in the same range, the panel Should come online. If the panel doesn't come online within 60 seconds simply restart the PC.

```
C:\ Command Prompt
Microsoft Windows [Version 10.0.19041.630]
(c) 2020 Microsoft Corporation. All rights reserved.

C:\Users\Steve>PING 192.168.168.125

Pinging 192.168.168.125 with 32 bytes of data:
Reply from 192.168.168.125: bytes=32 time<1ms TTL=64
Reply from 192.168.168.125: bytes=32 time=1ms TTL=64
Reply from 192.168.168.125: bytes=32 time=1ms TTL=64
Reply from 192.168.168.125: bytes=32 time=1ms TTL=64

Ping statistics for 192.168.168.125:
    Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),
    Approximate round trip times in milli-seconds:
        Minimum = 0ms, Maximum = 1ms, Average = 0ms

C:\Users\Steve>_
```

If the panel still isn't online, open a command prompt Window and type in ping 192.168.168.125 you should See a number of Reply messages showing the UNC100 is Connected in the same IP range as the PC.

If you don't receive a reply, it is likely that your UNC100 Isn't in the same range as the PC.

Reader 1 in the software is Reader A on the UNC100. Using our standard AWID SR2400 readers the wiring should be connected as above. Cable type Should be Belden 9538 or equivalent. Maximum Distance between reader and panel should not exceed 150m (Check documentation of each reader for supported maximum cable distances). Don't connect shield or the blue wire as this can act as a drain and may cause unusual behaviour.

Once this is done you are ready to add your first card. Click cards to the right of Setup.

Click New if the cardholder screen isn't
Already in edit mode.

Add your first name and last name.

To add the card number, click Add at
The bottom of the screen.

A message in the event viewer should show the card Updated to the panel.

You can now test your card at the doors.

Axiom LiteTM

Adding additional controllers to the system

- UNC100
- IRC2000
- URC2002
- URC2004 (Added as 2 URC2002)

Simply right click on Panels and select the controller you want to add.

For Additional information on controllers go to
www.rbhsecuritygroup.co.uk/axiom-lite-hardware
