
AxiomV at the University of Wales

Trinity College Carmarthen has recently upgraded their access control system to the Axiom V system from ARAS & RBH Security Group.

Clive Howells the Estates Manager of the University, approached Total Security Design in Bristol to discuss his requirements to manage 98 doors over 15 buildings and control over 1,000 cardholders, with the need for future expansion.

Being an approved Dealer of RBH Security access control products and having a vast amount of experience working with Large access control systems Andy Davies of Total Security Design didn't hesitate in recommending the Axiom V Product, The Axiom V with its user friendly GUI and unlimited capacity for expansion makes it the ideal choice for the customers requirements.

Systems Implemented:
